Track Constructed to Date	14,825 ft. (40%)
OCS Foundations Drilled & Poured to Date	115 (34%)

QUARTERLY SPOTLIGHT

In early March, KC Streetcar Constructors celebrated Women in Construction Week! Throughout the week, KC Streetcar Constructors highlighted different women who work on the project and shared their stories on social media. These women are critical to the success of the KC Streetcar Main Street Extension project!

CONSTRUCTION HIGHLIGHTS

Track construction was completed in the southbound lanes from 31st St. -39th St.

Underground electrical work for the future Traction Power Substation at 38th St. was completed.

Crews began receiving and installing wall panels for Bay 4 at the Vehicle Maintenance Facility.

Received nearly 700 tons of rail - the final delivery of rail for the project!
